Professional Summary

Mobile App Developer with 5 years of experience specializing in Flutter and Native Android (Kotlin). Skilled in building scalable, maintainable, and testable applications with a focus on performance, UI/UX, and clean architecture. Proficient in API integration, advanced state management, and debugging. Adept at contributing across full development lifecycles and adapting to cross-functional team environments to deliver impactful solutions.

Technical Skills

Languages: Dart, Kotlin, Java

Frameworks: Flutter, Android SDK

State Management: Provider, GetX, BLoC

Architecture: MVVM, Clean Architecture

Tools: Git, GitHub, GitLab, Android Studio, Postman, Figma

API Protocols: RESTful APIs, WebSockets

Others: YouTube Player, Google Maps SDK, Chart Libraries, In-App Purchases, Notifications, Ad Integration

Core Competencies

- Cross-Platform Mobile Development (Flutter)
 - Native Android Development (Kotlin)
 - Scalable App Architecture & Modular Code
 - API Integration (RESTful & GraphQL)
 - Advanced State Management (Provider, GetX, BLoC)
 - Custom UI Design & Responsive Layouts
 - Performance Tuning & App Optimization
 - Clean Code Practices (SOLID, DRY, KISS)
 - Git Version Control & Collaboration
-

Professional Experience

Senior Android Developer

Jameel | Dec 2025 - Present (Part - Time)

- Developed and maintained high-performance Android applications using **Kotlin** following **Clean Architecture (MVVM)** principles.
- Designed scalable and maintainable codebases with proper separation of concerns and modularization.
- Integrated **RESTful APIs**, **Myfatoorah** payment gateway, **Google Maps**, and **OneSignal** push notifications.
- Led feature development from requirement analysis to deployment, ensuring high-quality deliverables.

- Collaborated closely with **UI/UX designers**, backend engineers, and product stakeholders to build seamless and user-friendly applications.
- Optimized app performance, reduced memory leaks, and improved responsiveness using advanced debugging and profiling tools.
- Implemented **dependency injection (Hilt/Dagger)** for better code management and testability.
- Ensured code quality through **code reviews**, best practices, and adherence to Android development standards.
- Worked with **Git-based version control** and followed **Agile/Scrum methodologies** for efficient project delivery.
- Published and maintained apps on the **Google Play Store**, including monitoring crashes via tools like Firebase Crashlytics.

Software Engineer

Riseup Labs | *October 2022 - Present*

- Developed and maintained high-performance mobile applications using **Flutter** and **Android (Kotlin)** following **Clean Architecture (MVVM)** principles.
- Implemented scalable state management solutions using **Provider, GetX, and BLoC**, ensuring maintainable and testable code.
- Integrated **RESTful APIs, payment gateways (bKash, ABA), and deep linking** for seamless user experience and secure transactions.
- Designed modular and reusable components to improve development efficiency and code quality.
- Collaborated closely with **UI/UX designers**, backend engineers, and product teams to deliver intuitive and user-friendly applications.
- Optimized app performance by identifying bottlenecks, reducing load times, and improving memory management.
- Diagnosed and resolved complex issues, enhancing overall app stability and reliability.
- Followed **Agile/Scrum methodologies**, participating in sprint planning, code reviews, and continuous improvement processes.

Flutter Developer

Tickets For Travel | *January 2021 - September 2022*

- Developed cross-platform mobile applications using **Flutter**, focusing on performance, scalability, and responsive UI design.
- Integrated **RESTful APIs, WebSockets, Google Maps, and Places API** to deliver real-time and location-based features.
- Worked closely with backend developers to ensure smooth data flow and API efficiency.
- Improved application stability by identifying and fixing bugs, and optimizing performance across multiple devices.

Projects

Jameel (Rider & Captain)

Built with Kotlin, RESTful API, Myfatoorah Payments, Multi-language and GoogleMap

Ride-hailing mobile applications for passengers (Rider) and drivers (Captain), enabling real-time booking, live tracking, and route navigation. Supports trip management, fare estimation, driver earnings tracking, and secure

digital payments. Includes deep linking, push notifications, and performance optimizations for a scalable, seamless user experience.

[Jameel জমیل](#) | [Jameel Captain](#)

eCook

Built with Flutter, GetX, RESTful API, bKash & ABA Payments, Deep Linking, Multi-language

Smart energy tracking app integrated with electric stove devices. Displays daily usage, cost comparisons, and allows secure payment. Includes deep linking, tutorials, FAQs, and multi-language support.

[Android App Link](#) | [iOS App Link](#)

শিক্ষক সহায়িকা

Built with Flutter, GetX (State Management), RESTful API, YouTube Player

An educational tool for teachers featuring NCTB guides, PDF viewer, video tutorials, and embedded web content.

[Android App Link](#)

U-Youth Burkina

Built with Kotlin, XML, MVVM, Retrofit, Coroutines, ExoPlayer, RESTful API

Youth engagement platform with modules like Stories, Community Chat, Opinion forms, Results tracking, and U-Programa. Developed using MVVM and Coroutines with media and task handling features.

U-Report BD

Built with Kotlin, Java, MVVM, Retrofit, Coroutines, YouTube Player, Multi-language

App includes Stories, video playback, and dynamic surveys from JSON via ONA. Built with MVVM architecture, supports multiple languages, and displays survey results for real-time insights.

Education

Bachelor of Science in Computer Science and Engineering (CSE)

Model Institute of Science and Technology (MIST), Gazipur, Bangladesh

Graduation Year: 2019

Language

- Bengali: Native
 - English: Intermediate Proficiency (*Good comprehension, moderate speaking skills*)
-

Awards

Best Software Developer – Q2 & Q3 2024

Recognized by Riseup Labs for exceptional performance, innovation, and impactful contributions to mobile application development.
